

## Project Manager – Construction Survey

---

Pasquini & Associates is a firm of professional engineers, land surveyors, technologists and designers specializing in land development and municipal engineering, operating in Calgary and Southern Alberta.

Growth of our firm is carefully managed with an eye on never losing sight of the personal touch that our clients desire. Being an employee of Pasquini and Associates offers you the opportunity to grow with our company while working with well recognized and respected developers and builders in the Calgary's land development industry. We also foster a team oriented, work hard, play hard culture that cares about career development and succession planning.

Pasquini and Associates is seeking an experienced Project Manager to join our growing geomatics team. The successful candidate will be responsible for; project management, overseeing of technical staff, estimating, survey calculations and leadership on a number of construction related projects in the City of Calgary and surrounding areas.

### **Experience and Educational Requirements:**

- Minimum 10 years of experience as a project manager.
- University degree or diploma in geomatics technology or equivalent from an accredited post-secondary institution is preferred.
- Proficiency in oral and written English communication skills.
- Ability to interpret legal survey, engineering, architectural and structural plans.
- Strong understanding of Civil 3D & Microsurvey.

### **Responsibilities:**

- Report to Andrew Roop, Principle & Manager.
- Project estimating a variety of construction related project types.
- Overseeing and managing projects, as well as, maintaining project budgets.
- High level of comprehension of Issued For Construction (IFC) plans, with the ability to; calculate, post calculation review and trouble shoot IFC plans.
- Critically review and check field returns, which includes; post field checks, grade sheet review and data/file management.
- Uphold PA's policies and assist in establishing new polices & procedures.
- Strong technical aptitude.
- Maintain existing relationships, as well as, built relationships with prospective customers.
- Compliance with Pasquini & Associates' Health and Safety policies and procedures.

The compensation package for this position will be commensurate with level of qualifications of the successful candidate. The ability to work remotely is available for this position.

Please apply in confidence to Ryan Medicott ([rmedicott@pasquini.ca](mailto:rmedicott@pasquini.ca)). We thank all candidates for their interest however, only those selected for an interview will be contacted.
